

ITC 250/CPET 499 Web Systems
Fall 2017

Homework Assignment 5
JavaScript for Dynamic Web Page

Assigned Date: Sept. 29, 2017
Due Date: October 5, 2017 (as email attachment)

Hw 5 Activities:

1. Browsed and study all the Listing codes from
http://www.etcs.ipfw.edu/~lin/Presentation/JavaScript/06_JsFormsEvents.html.
2. For the following examples:
Example 6-2 – Create a check box with validation
Example 6-3 - Upload a file to a web browser
Example 6-4 – Use option control and function
Example 6-5 - Button, Events: onload, onclick, onmouseover
Example 6-9 – User input and password verification
listed with its Javascript code, explain briefly the purpose of Javascript code, its function, and how it works; use the sample documentation Example 6-1 for your reference.
3. Prepare your Hw 5 with a Microsoft Word file with the HTML/JavaScript codes, save it as Hw5-ITC250-CPET499-YourName.docx.
4. Submit your Hw5 as an email attachment to Prof. Lin at lin@ipfw.edu.
