

# Racine TALLA: The Journey Progress report 2:

CPET499: WEB SYSTEMS

# Project Summary:

- ▶ This website (project) will allow users, who are family, ex-teammates and friends to be able to navigate through my page and be a part of my journey (basketball career).
- ▶ It will gather information from a database that will be displayed under a table form.
- ▶ It will also have the functionality of counting the number of visits, date and IP address of the visitors.
- ▶ It will have links to different pages to show more about my basketball career.
- ▶ They can also insert comments and will have a page to start dialogs with myself or just contact me through email, phone and all the other contact info presented in the contact page.

# Overview:

- ▶ The log in option will be disabled
- ▶ The visit count will be monitored
- ▶ Emails can be sent and contain files that I can then receive and upload to the page; Everyone shouldn't just be able to add to the page.

# Project Scope:

- ▶ Activities:
  - ▶ Design the mock up for the webpage
  - ▶ Have an abstract built of the page
  - ▶ Do the coding
  - ▶ Design and build the database
  - ▶ Data entered in the database
- ▶ Testing
  - ▶ Make sure only users with log in are allowed
  - ▶ Make sure database coordinates appropriately
  - ▶ Emails and phone go through

# Risks and problems

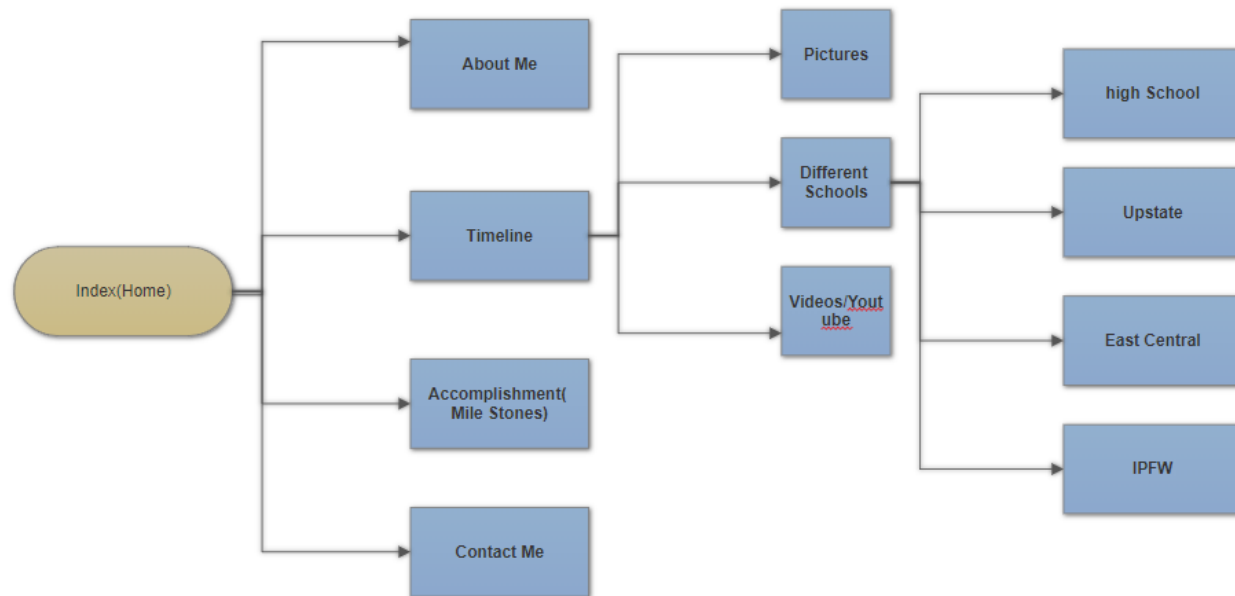

- ▶ Risk of database not cooperating
- ▶ Scope respects the time frame
- ▶ Security
  - ▶ Everyone is not allowed to post in the page
  - ▶ Only one has administrative access
- ▶ Possible scope change depending on milestones accomplished
- ▶ I will have more update on the second progress report

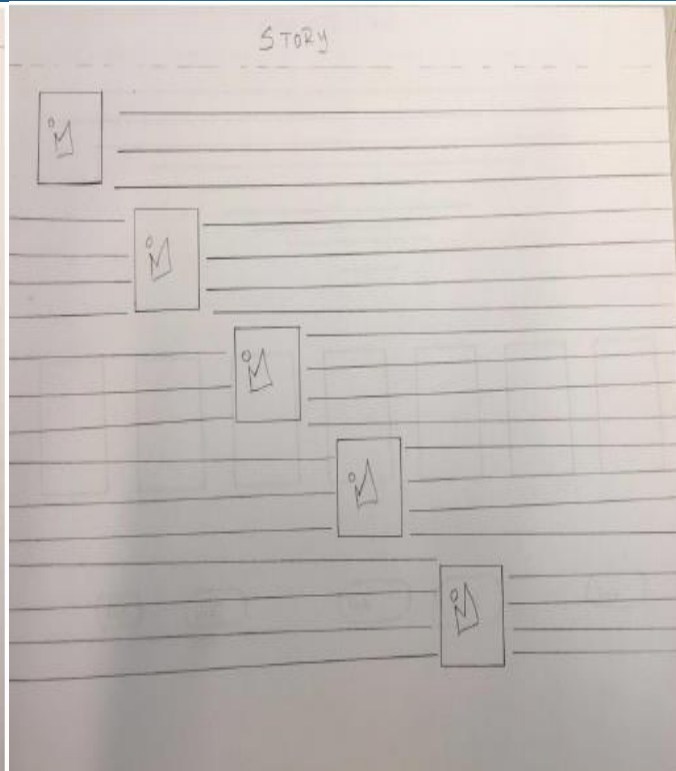

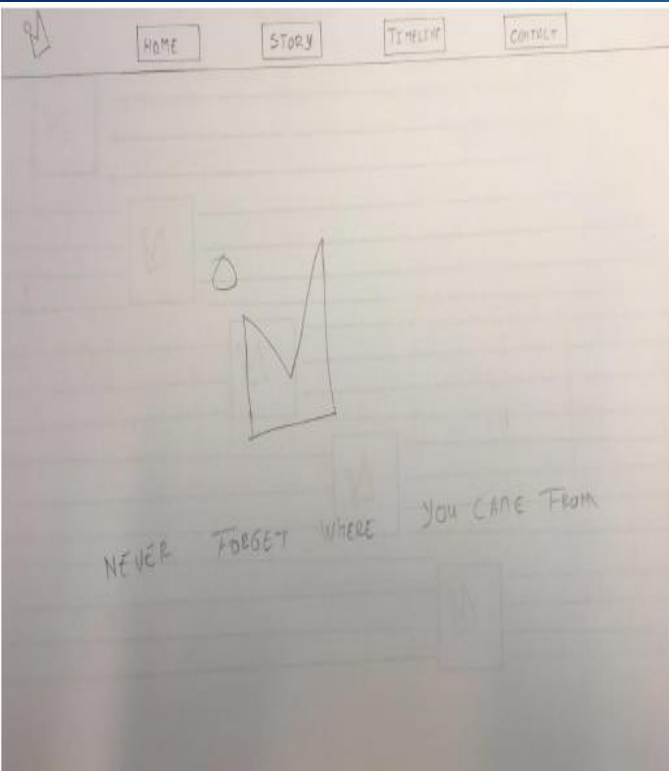

# Project Milestones and deliverables:

- ▶ Prototype
  - ▶ Working page
  - ▶ Working adding images and comments
  - ▶ All coding correctly applied
  - ▶ HTML, CSS, JS, PHP and Database correctly implemented
- ▶ Final Report
- ▶ Progress Report 1
- ▶ Progress Report 2
- ▶ Final Presentation

# Web Design

# Mock Up page

# Software/Programming tools:

- ▶ Dreamweaver
  - ▶ For coding
- ▶ SQL Server Management Studio
  - ▶ For database
- ▶ Coding
  - ▶ HTML
  - ▶ CSS
  - ▶ PHP
  - ▶ JS
- ▶ XAMPP
  - ▶ Apache/MySQL

- Hardware
  - HP notebook
  - 8Gb Ram

# Schedule

	A	B	C	D	E
1		<b>Time</b>	<b>Timeline</b>	<b>Cost</b>	
2	<b>Design Brief</b>	1 day	11/25/2017	\$0	
3	<b>Site map</b>	1 day	11/26/2017	\$0	
4	<b>Visio drawing</b>	1 day	11/27/2017	\$0	
5	<b>Mockup site</b>	1 day	11/28/2017	\$0	
6	<b>Users to be allowed</b>	1 day	11/29/2017	\$0	
7	<b>Data gathering</b>	1 day	11/30/2017	\$0	
8	<b>Coding</b>	1 day	12/1/2017	\$0	
9	<b>Database implementation</b>	1 day	12/2/2017	\$0	
10	<b>Testing</b>	1 day	12/3/2017	\$0	
11	<b>Presenting</b>	1 day	12/4/2017	\$0

# Already Accomplished:

- ▶ Site Map
- ▶ Mock Up
- ▶ Test that will be in the page
- ▶ Images
- ▶ Datable data

# Progress and Changes since the first Progress Report

- ▶ The scope has changed a bit:
  - ▶ I am no longer going with the log in page
  - ▶ I will have a visit counter
- ▶ Deliverables:
  - ▶ Everything has been implemented
    - ▶ Database is the only thing left
    - ▶ I have mock data in place right now just for the design but that will be replaced by the database.
    - ▶ I am in the time scope and will deliver the page on time

THANK YOU
