

# Clash of Clans Wiki

Adam Flagg

## Summary

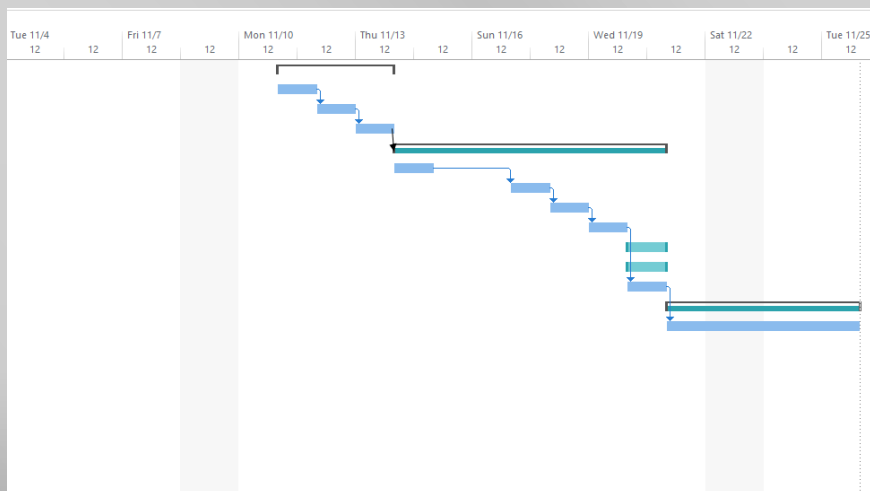

This website will help players focus on specific areas of the game, as upgrading costs time and in-game resources. The website will give players the ability to plan their next major upgrades, and attack and defense strategies. This website will hopefully give the players an advantage when playing.

This project will be a multipage website that people can view using most web browsers and computer systems. I will be using Apple's Safari and OSX during testing and use Text Wrangler for HTML editing. I plan on creating the website over a few week period, which will allow me to continue to think of new and different ideas for the page.

## Project Schedule

## Cost

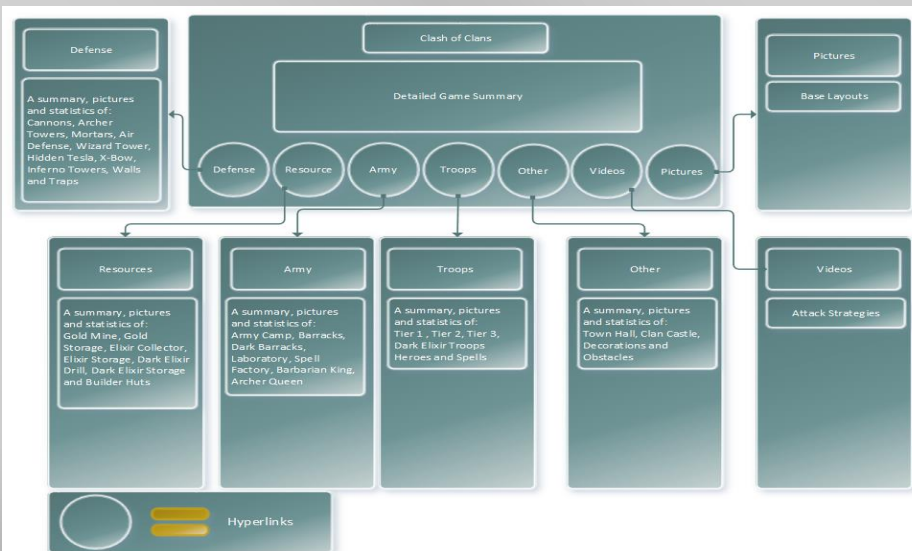

### Estimated Cost

I am hoping to put about 3 hours into the website per week over the next two months costing a total of 24 hours. I am currently using Frontier for my Internet provider. As I am paying \$34.99/month, I am estimating that the project will be complete within the next two months costing a total of \$69.98 + tax. I feel like that with 6Mbps, I will have a sufficient speeds to create and power the website. I am trying to keep cost down to a minimum.

Frontier			
Name	Cost	Speed	Features
Broadband Max	\$34.99/mo	6Mbps	Wi-Fi Router, 24/7 Support
Broadband Ultra	\$44.99/mo	12Mbps	Wi-Fi Router, 24/7 Support
Broadband Ultimate	\$54.99/mo	24 Mbps	Wi-Fi Router, 24/7 Support

Comcast			
Name	Cost	Speed	Features
Economy Plus	\$19.99	3Mbps	Wi-Fi Router, 24/7 Support
Internet Plus	\$39.99	25Mbps	Wi-Fi Router, 24/7 Support
Internet Plus w/Blast	\$49.99	50Mbps	Wi-Fi Router, 24/7 Support
