Excluding MSBOs ¹	3,707	729	4,435	739	-16.4	-1.4	21.6	19.6
MSBOs	1,459	483	1,727	572	-15.5	-15.7	14.3	15.2
B-to-C*	10,412	298	10,840	292	-3.9	2.1	8.8	7.7
Retail	3,638	145	3,953	142	-8.0	2.1	4.3	3.7
Selected Services	6,774	153	6,887	150	-1.6	2.2	4.5	4.0

* We estimate business-to-business (B-to-B) and business-to-consumer (B-to-C) e-commerce by making several simplifying assumptions: manufacturing and wholesale e-commerce is entirely B-to-B, and retail and service e-commerce is entirely B-to-C. We also ignore definitional differences among shipments, sales, and revenues. The resulting B-to-B and B-to-C estimates, while not directly measured, show that almost all the dollar volume of e-commerce activity involves transactions between businesses. See the "Note to reader" for cautions relating to the interpretation of the "Total" shown here.
