

C32A ECM MODIFICATION

NIK PETERS & NATHAN WEIDES

PAUL LIN, INSTRUCTOR
HAL BROBERG, ADVISOR

APRIL 29, 2016

- **Executive Summary**
- **Introduction**
- **Problem Statement and Solutions**
- **System Requirements and Validation**
- **System Analysis**
- **System Design**
- **Simulation**
- **System Integration and Testing**
- **Validation**
- **Conclusion and Lessons Learned**

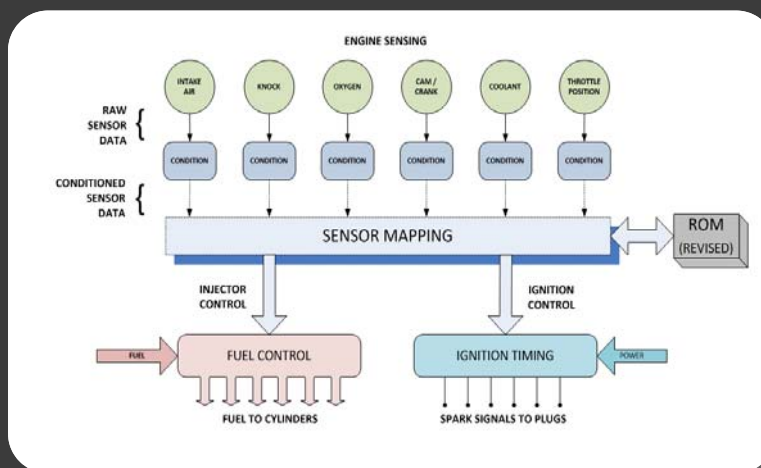

- **Mid 1990s Honda C32A Engines**
- **Fuel Economy**
- **Increased Power**
- **No aftermarket programs available**
- **Start from Scratch**
- **Wanted to see if it could be done!**

PROJECT REQUIREMENTS

Project: C32A ECM Modification				
Revision: 4				
Date: 20-Apr-16				
Requirement Data				Verification Plan
ID	Requirement Type	Requirement (Shall or Should statements)	Verification Method	Date Verified
1	Operational	The system shall increase the H.P. of the C32A Acura engine	Test	15-Apr-16
2	Operational	The system shall increase the torque of the C32A Acura engine	Test	15-Apr-16
3	Operational	The system shall not change normal emissions of the C32A Acura engine	Test	15-Apr-16
4	Operational	The system should increase the fuel efficiency of the C32A Acura engine	Demonstration	15-Apr-16
5	Operational	The system shall not change the shift controls of the C32A Acura transmission	Demonstration	15-Apr-16
6	Functional	The system shall control the Fuel/Air ratio of the C32A Acura engine	Test	15-Apr-16
7	Functional	The system shall control the Ignition Timing of the C32A Acura engine	Test	15-Apr-16
8	Functional	The system shall read the engine RPM from the ECM	Test	15-Apr-16
9	Functional	The system shall read the engine temperature from the ECM	Test	15-Apr-16
10	Functional	The system shall read the engine throttle position from the ECM	Test	15-Apr-16
11	Functional	The system shall read the engine mass air flow sensor from the ECM	Test	15-Apr-16
12	Performance	The system shall not hinder the vehicle's normal ECM processing speed	Test	15-Apr-16
13	Performance	The system shall not hinder the vehicle's normal ECM functionality	Test	15-Apr-16
14	Performance	The system should increase the fuel efficiency by %15	Test	15-Apr-16
15	Performance	The system should increase HP by %10	Test	
16	Performance	The system should increase torque by % 10	Test	
17	Physical	The system shall occupy the same amount of memory as the stock code	Inspection	20-Mar-16
18	Physical	The system shall replace stock ECM PROM with removable PROM	Inspection	20-Mar-16
19	Environmental	The system shall run at temperatures up to 120°F	Demonstration	15-Apr-16
20	Environmental	The system shall run at temperatures down to -20°F	Demonstration	15-Apr-16
21	Environmental	The system shall function in normal automotive S/V conditions	Demonstration	15-Apr-16
22	Environmental	The system should be able to be implemented into all C32A Acura engine ECMs	Demonstration	

6

REQUIREMENT 4

The system should increase the fuel efficiency of the C32A Acura engine.

Fuel Economy Tests			
Test Run	Gas Usage	Miles Driven	Miles/Gallon
Stock	1.4	31	22.14285714
Modified	0.9	30.95	34.38888889
Difference:			12.24603175

PROJECT DESIGN & IMPLEMENTATION

- ECM disassembly
- De-soldering PROM chip
- Soldering new socket in place
- Programming stock calibration onto new PROM chip

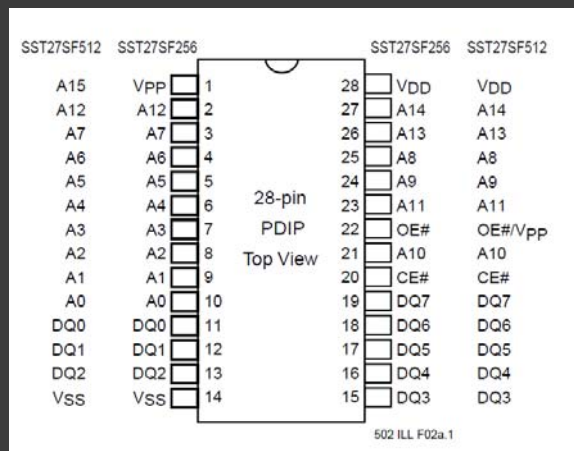

13

14

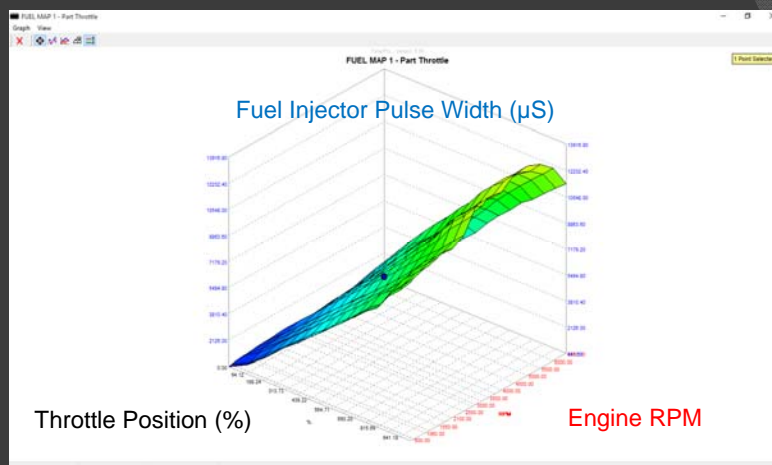

SOFTWARE DESIGN & IMPLEMENTATION

STOCK ECM PROM CALIBRATIONS

17

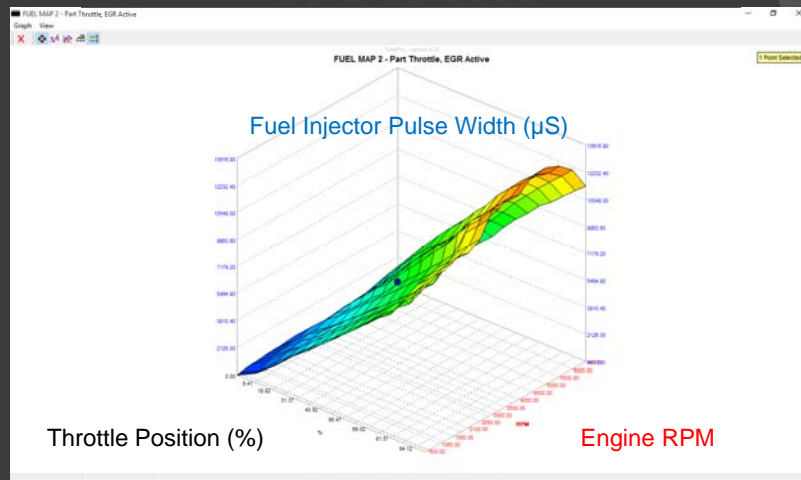

FUEL MAP 1 – PART THROTTLE

$$Inj.P.W. = f(T.P\%/RPM)$$

18

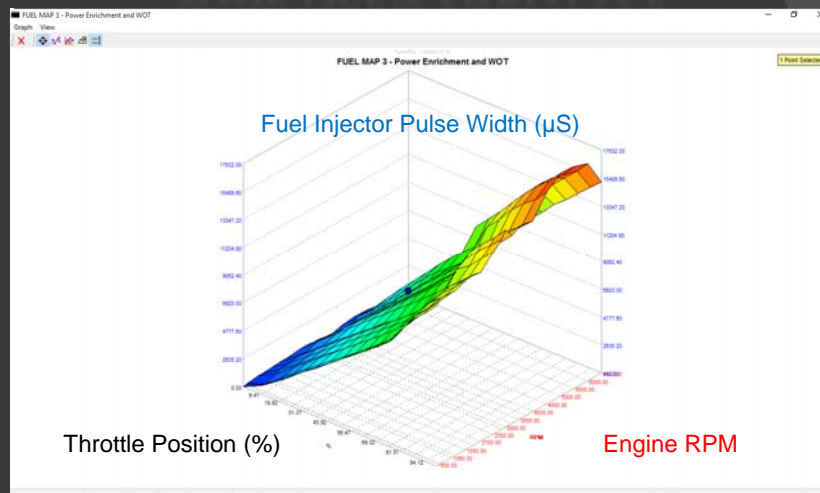

FUEL MAP 2 – PART THROTTLE EGR ACTIVE

$$Inj.P.W. = f(T.P\%/RPM)$$

19

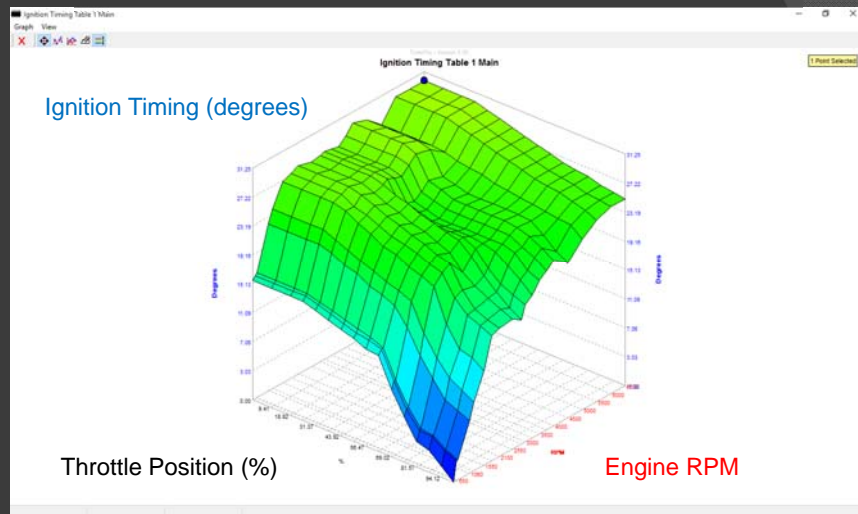

FUEL MAP 3 – POWER ENRICHMENT & WIDE OPEN THROTTLE

$$Inj.P.W. = f(T.P\%/RPM)$$

20

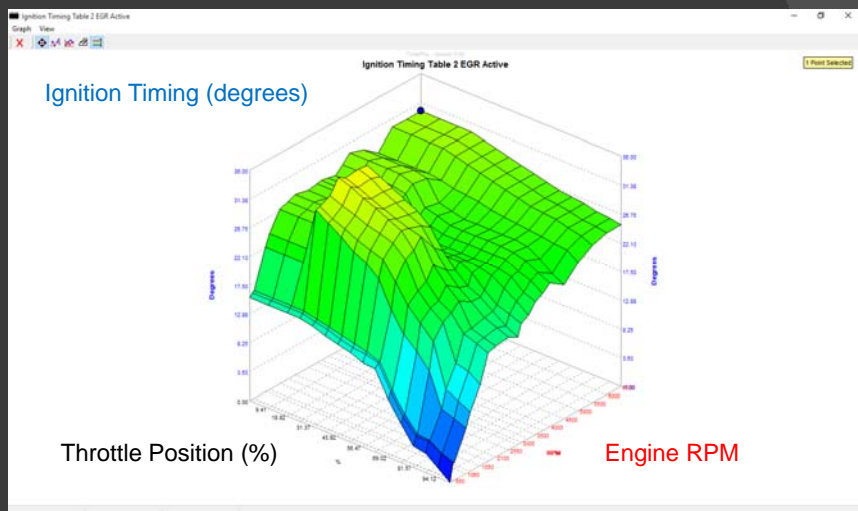

IGNITION TIMING TABLE 1 - MAIN

$$I.T. = f(T.P\%/RPM)$$

21

IGNITION TIMING TABLE 2 – EGR ACTIVE

$$I.T. = f(T.P\%/RPM)$$

22

MODIFIED ECM PROM CALIBRATIONS

23

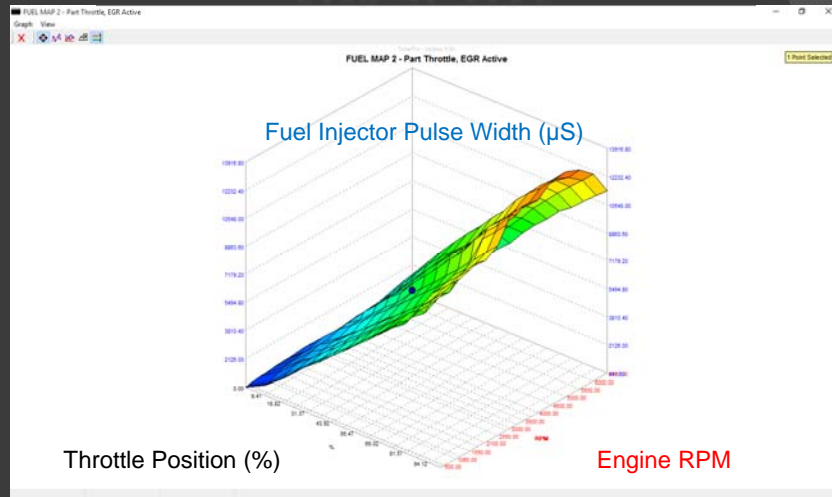

FUEL MAP 1 – PART THROTTLE

$$Inj.P.W. = f(T.P\%/RPM)$$

24

FUEL MAP 2 – PART THROTTLE EGR ACTIVE

$$Inj.P.W. = f(T.P\%/RPM)$$

25

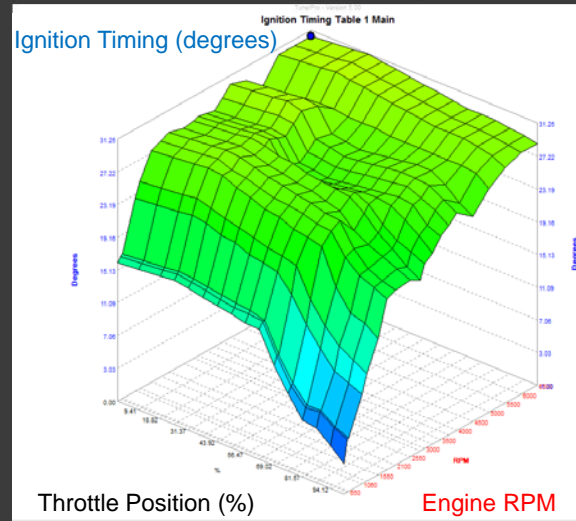

FUEL MAP 3 – POWER ENRICHMENT & WIDE OPEN THROTTLE

$$Inj.P.W. = f(T.P\%/RPM)$$

26

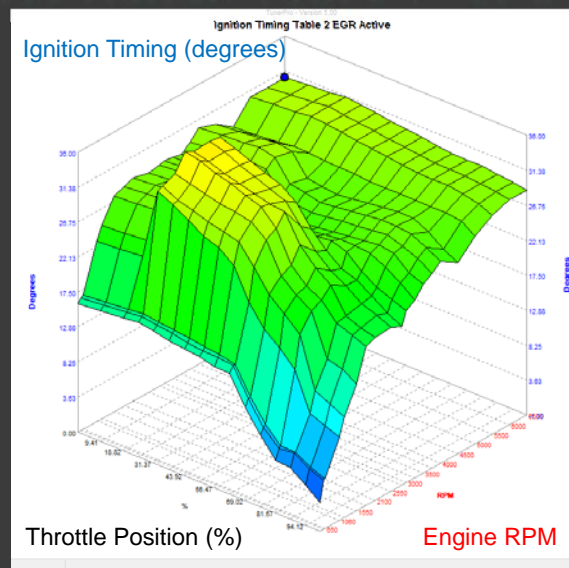

IGNITION TIMING TABLE 1 - MAIN

$$I.T. = f(T.P\%/RPM)$$

27

IGNITION TIMING TABLE 2 – EGR ACTIVE

$$I.T. = f(T.P\%/RPM)$$

28

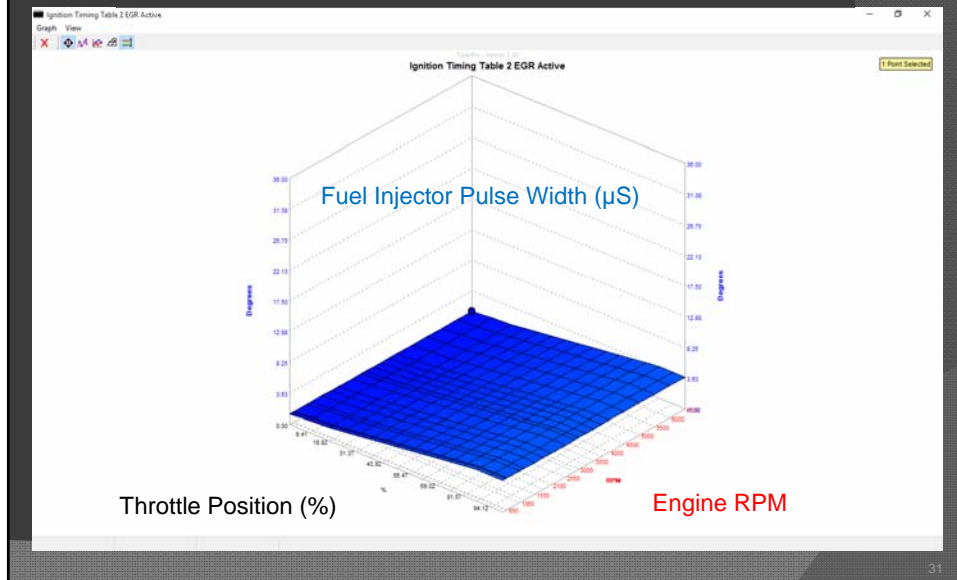

DIFFERENCE IN FUEL MAPPING

DIFFERENCE IN MAIN IGNITION TIMING

DIFFERENCE IN IGNITION TIMING EGR ACTIVE

SYSTEM INTEGRATION & TESTING

SOMAT DAQ SYSTEM

33

OPTICAL SENSOR

34

THERMOCOUPLE

35

GPS SPEED SENSOR

36

BACKFEEDING ECM PNS

37

1.3 MILE TEST TRACK

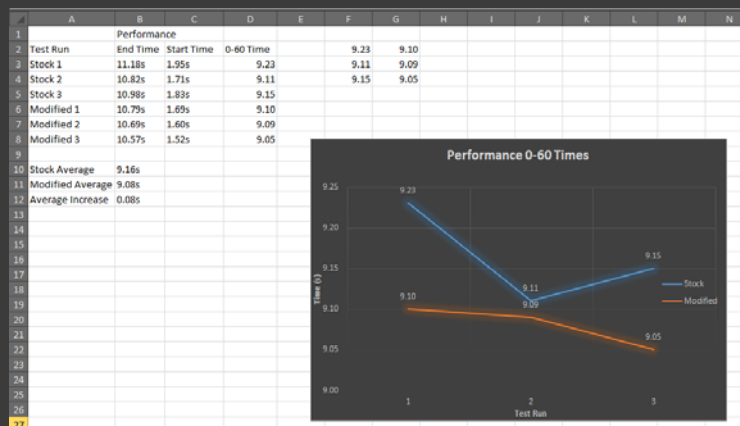

38

CONCLUSION

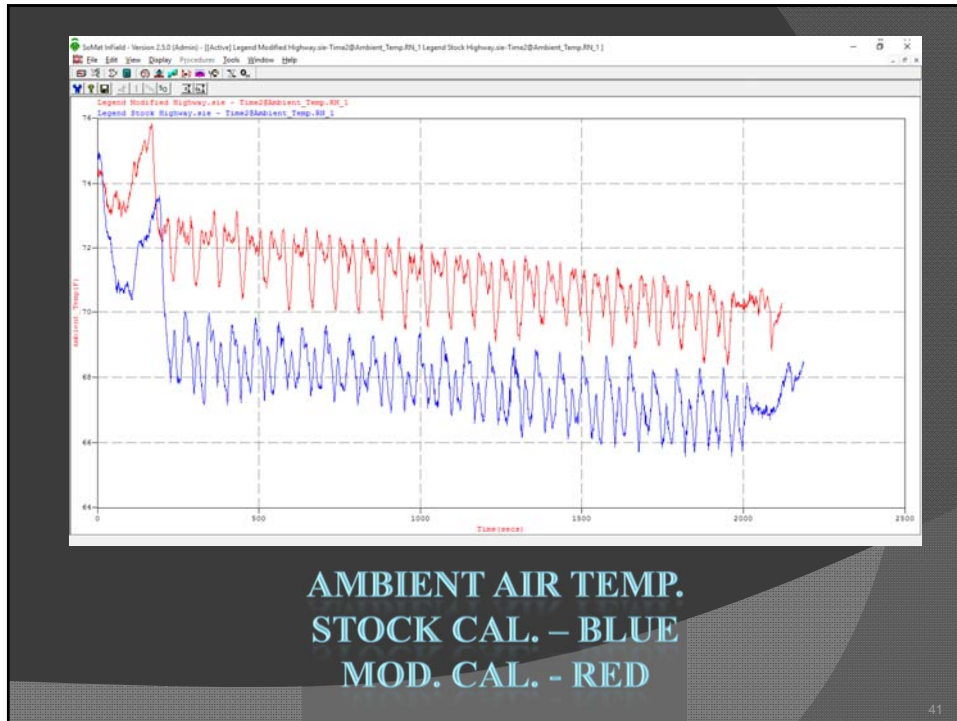

- Success!
- Increased Fuel Efficiency
- Increased Engine Power
- Project Went Smoothly the Whole Way Through
- Lessons Learned

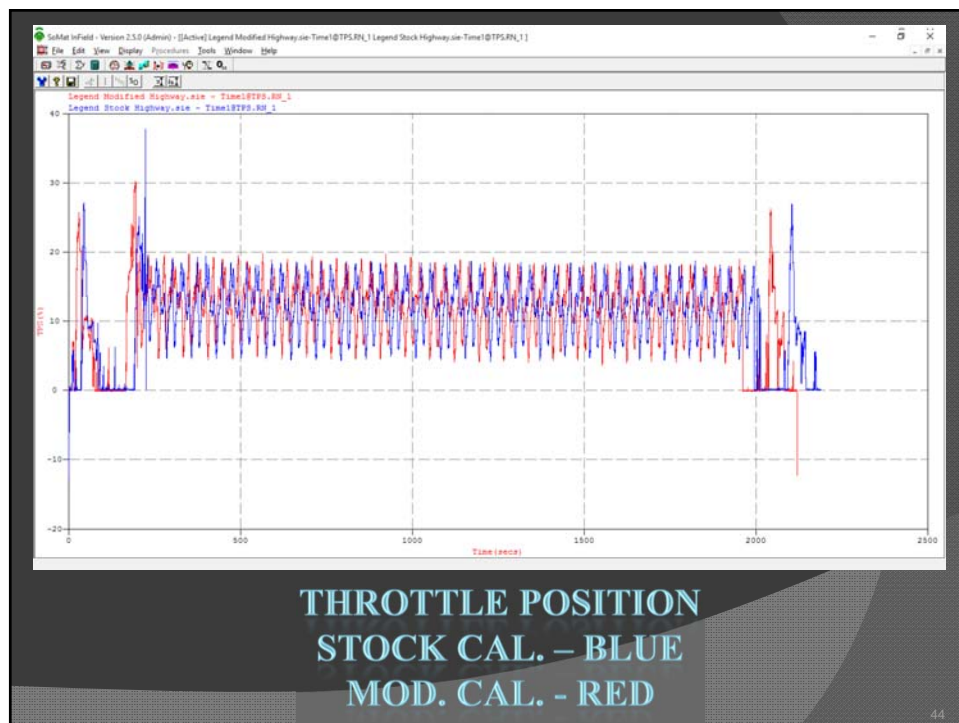

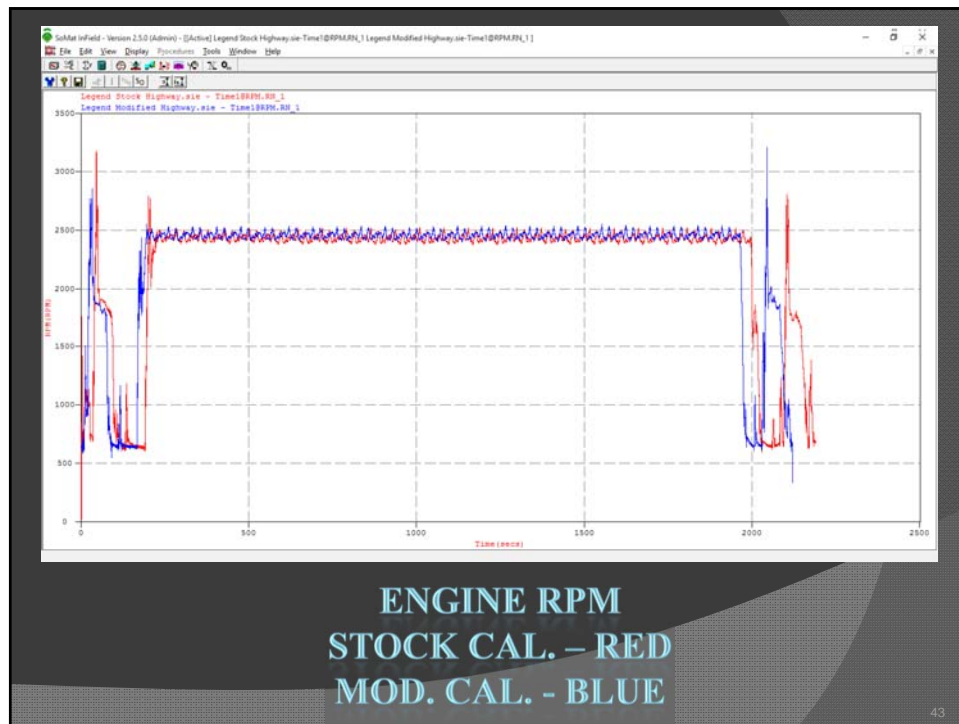

39
